

February 10, 2021

I am writing to seek your help in soliciting applications to the summer undergraduate research program at the University of Southern California. Briefly, this ten-week program is an opportunity for students to conduct research in residence in our Chemistry Department. We offer projects in chemistry, biochemistry, and nanoscience. Housing, student health insurance and travel costs are covered by the Chemistry Department, and students will also receive a stipend. Students who are U.S. citizens or permanent residents may apply online by visiting:

[http://chem.usc.edu/undergraduate/reu\\_prog.html](http://chem.usc.edu/undergraduate/reu_prog.html).

Enclosed you will find a poster which advertises the program. We'd appreciate it if you could distribute the poster, and encourage your students to apply. Please be advised that the application deadline is **March 1, 2021**.

For more information, please don't hesitate to contact Program Coordinator, Anahit Martirosyan by email at [reu@chemmail.usc.edu](mailto:reu@chemmail.usc.edu).

Sincerely,

Kyung W. Jung, Ph.D.  
Associate Professor of Chemistry
