

ABBY FineReader is an optical character recognition (OCR) software that converts scans, images, and PDFs into editable documents. DAS uses this software to convert inaccessible textbooks, handouts, and more into accessible documents that can be used with screen readers and text-to-speech tools.

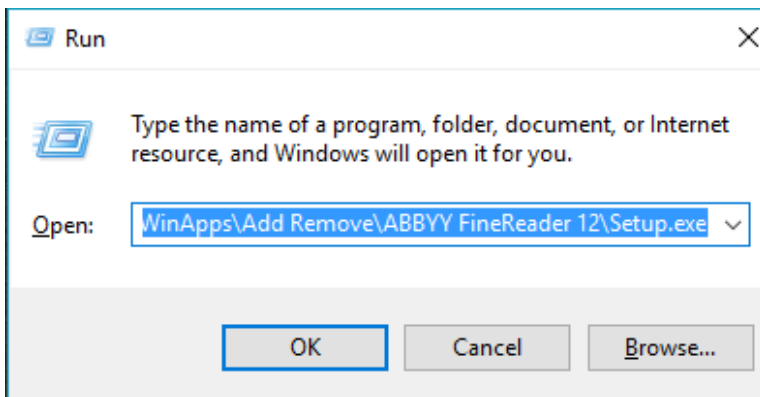

How to Download ABBY Fine Reader 12 from the Berea College Network

1. Search for the **Run** application in the Start Menu (the Search function begins when you start typing in the Start menu).

2. Copy and paste the following into the **Run** application window:

<\\casey-nt\WinApps\Add Remove\ABBY FineReader 12\Setup.exe>

3. A window will open. Follow the prompts to complete the installation process.
